

INTELLIGENT AUTOMATION / RPA

We skillfully combine analysis with process automation in our services. This enables a significant improvement in the efficiency of enterprises from a wide range of industries. Robotic process automation is becoming a market standard. We will adjust the scope of our support to your needs. You can use individual Onwelo competences or an end-to-end service covering the analysis of RPA potential, robot development and maintenance services.

Scope of **support**

- ★ Project of RPA architecture including the client's infrastructure
- ★ Analysis of robotic process automation potential using dedicated tools
- ★ Analysis of processes and their documentation
- ★ Redesign of processes
- ★ Robot development
- ★ Solution testing
- ★ Production implementation
- ★ Maintenance processes
- ★ RPA governance

Benefits

**Optimized
operating costs**

**Increased speed
in executing tasks**

**Minimized risk of
errors occurring**

**Increased work
organization flexibility**

**Improved team
work efficiency**

**Full scalability
of the solution**

About us

We are a team of experienced analysts and developers in the field of business process automation. We use renowned Robotic Process Automation (RPA) technologies. We combine advisory and analytical skills in the field of process evaluation and high-quality development standards.

How do we **stand out**?

- ★ Knowledge of a certified team of RPA analysts and developers operating on the market since 2016
- ★ Extensive experience in the end-to-end implementation of RPA — we help in "making

the first steps” and in optimizing already implemented technical and organizational solutions, regardless of the industry and business function

- ★ Best practices and tools developed to carry out RPA projects effectively
- ★ Services in the field of maintenance of RPA solutions by combining experience in robot development with competences in maintaining IT solutions
- ★ Strong IT competences — we are able to diagnose and solve every issue
